

Hydrology Database

Quality Codes

Peak Stream

Quality Code	Character	Description
1		Good continuous records
2		Good quality edited data, change from original
30	T	Theoretical peak from slope area survey, timing may be unknown
35		Peak good record, timing unknown
140	B	Peak recorded below instrument threshold / orifice
148	U	Unverified Data
151	M	Missing data, no electronic data
201	M	No data/records available
