

Hydrology Database

Quality Codes

High-Resolution Stream

Quality Code	Character	Description
1		Good continuous records
2		Good quality edited data, change from original
36		USGS Stream Data from Logger
56	@	Computed from values reviewed by USGS
60	A	Above Rating Table
65	*	Computed from values edited by USGS
85	~	Value computed from system interpreted values (USGS)
100	e	Estimated distribution correlated with nearby station(s)
120	&	Flow has bypassed gage and was not reflected in hydrograph
125	U	Values were not used in computation of daily value (USGS)
145	X	Flow data varies due to temperature effects - average daily values should be used for non-storm periods.
151	M	Missing data, no electronic data
152	B	Flow below instrument threshold / orifice, data not to be used
201	M	No data/records available
